Project for the installation and signage of speed control systems at certain accident black spots of the state road network within the regions of La Rioja, Aragon, Catalonia, Madrid and Valencia.

**LOCATION :** Spain

**BUDGET:**

**CLIENT:** Ministry of Public Roads

**DATE (START-COMPLETION):**

#### GENERAL LOCATION OF THE WORKS

### OBJECTIVES OF THE SCHEME

The aim of the project is to define, in appropriate detail, the works required for the installation and signage of new static speed control systems at certain accident black spots on roads operated by the State Highways Division within the regions of La Rioja, Aragon, Catalonia, Madrid and Valencia.

The ultimate aim is to achieve a significant reduction in maximum speeds registered on the selected accident black spots and consequently a significant fall in the number of accidents, thereby improving road safety.

### TASKS PERFORMED

- Installation of Speed Control Systems and their Communication with the Traffic Management Centre and associated Control Centre/s regarding the processing of all fines imposed.
- Electricity supply.
- Public works.

### EXAMPLES OF EQUIPEMENT TO BE INSTALLED
